

Sustainability Pledge

Introduction

Provide a recap of the 17 Sustainable Development Goals using the [resources available](#) and discuss the importance of a global effort towards reaching the goals.

Individual reflection

Ask learners to think about one SDG they feel strongly about and one action they can take to support that goal.

Create Action Cards

- Ask each learner to write their chosen SDG on an index card
- Below the SDG, they can write a specific action they can take to help progress towards the goal, for example, reduce single-use plastic by using a reusable water bottle.

Ask a few volunteers to share their chosen SDG and corresponding action with the group.

Display and commit

Create a designated "SDG Action Wall" in the classroom. Learners can pin or tape their cards to this wall as a visual commitment.

You can also use the [Sustainability Pledge template](#) to display your commitment as a class.
